

## IOSH Working Safely

The Institution of Occupational Safety and Health (IOSH) courses have been developed by Safety4Business to address the training needs of the non-health and safety expert. Highly successful, the certified courses are delivered to an average of 60,000 people per year. The Online, or CDROM based, 'Working Safely' course is designed to ensure that the learner fully understands their responsibility for ensuring their own health and safety as well as that of other people. The online course follows the same syllabus as that of the classroom based version.

### IOSH Course Outline-

- **Module 1: Introducing 'Working Safely'**  
An introduction to the course and the principals of why health and safety is important
- **Module 2 'Defining Hazard and Risk'**  
Understanding what constitutes a 'hazard' and recognising the different types  
Understanding the principals of risk and risk assessment
- **Module 3 'Identifying Common Hazards'**  
Recognising 18 of the most common workplace hazards  
How they arise and how to remove or reduce the risk
- **Module 4 – 'Improving Safety Performance'**  
Understanding safe systems of work  
Recognising safety signs  
An overview of emergency procedures and first aid  
Understanding the basics of measuring health & safety and reporting incidents
- **Module 5 – 'Protecting our Environment'**  
Understanding how industry affects the environment  
Discovering what industry and the individual can do to reduce pollution and waste

### Final Assessment

30 questions drawn at random from a bank of 100 questions

### Task Book

The Task Book consists of a series of exercises and observations to be undertaken following completion of the course. It is intended to help the learner to transfer what they have learned about specific health and safety topics to the 'real life' environment of their own workplace.

### Tutor Support

Online tutor support via email or fax is available for students whose organisations cannot provide a suitably qualified health and safety professional.

### Certification

An IOSH 'Working safely' certificate is awarded to all those who undertake the course and successfully complete both the course units and Final assessment. Understanding of the course material is evaluated by means of a 25-minute online assessment consisting of 30 multi-choice questions and hazard identification questions.

**Duration**            7-8 hours of interactive learning

**Prices include testing and certification. Please phone for a quotation.**
